

This listing of claims will replace all prior versions and listings of claims in the application.

### **Listing of Claims**

Claims 1-2. Canceled

Claim 3. (Currently Amended) A method of determining a useful salt, from within a series of salts of a particular medicinal compound, for use in making a composition of matter comprising an inclusion complex of said salt in a cyclodextrin, said method comprising:

- a. determining a quantity of said medicinal compound required for therapeutic efficacy;
- b. choosing a maximum total dose in which to administer said quantity of medicinal compound;
- c. calculating the minimum required solubility of a salt of said compound necessary to formulate said maximum total dose;
- d. obtaining said series of salts;
- e. determining the equilibrium solubility of each of said salts in said cyclodextrin; and
- f. selecting, as said useful salt, a salt from said series having an equilibrium solubility in said cyclodextrin sufficient to permit making a total dose equal to or less than said maximum total dose;

wherein said medicinal compound is ziprasidone

Claims 4-15. Canceled

Claim 16. (Currently Amended) A method of determining a useful salt, from within a series of salts of a particular medicinal compound, for use in making a composition of matter comprising said salt and a cyclodextrin, said method comprising:

- a. obtaining said series of salts;
- b. determining the equilibrium solubility, in aqueous cyclodextrin solution, of each of said salts in said series; and
- c. selecting, as said useful salt, a salt in said series having a solubility in said cyclodextrin solution equal to or greater than a desired target solubility;

wherein said medicinal compound is ziprasidone

Claim 17. (New) A method of locating one or more salts of ziprasidone, said salts having a solubility in a cyclodextrin equal to or greater than a desired target solubility, comprising obtaining a series of salts of ziprasidone, determining the equilibrium solubility

of each salt in said series in an aqueous solution of said cyclodextrin, and comparing each measured solubility with said target solubility.

Claim 18. (New) A method of determining a useful salt, from within a series of salts of ziprasidone, for use in making a composition of matter comprising said salt and cyclodextrin, said method comprising.

- (a) obtaining said series of salts;
- (b) determining the equilibrium solubility, in aqueous cyclodextrin solution, of each of said salts in said series; and
- (c) selecting, as said useful salt, a salt in said series having a solubility in said cyclodextrin solution equal to or greater than a desired target solubility.
